felix-jimenez.com 970-274-9808 @ felix.m.jimenez3@gmail.com

EXPERIENCE

Research Assistant

Texas A&M University

Dec. 2020-Present College Station, TX

- Scalable Bayesian optimization, and Gaussian processes approximation.
- TA for statistical learning for one semester.

Research Intern

Microsoft Research New England

May. 2022-Aug. 2022 Cambridge, MA

- Stats and ML group.

Mathematical Statistician (Prev. Research Assistant)

National Institute of Standards and Technology

05/2018-09/2020 Boulder, CO

- Stats/ML research: GAN performance on low dimensional multimodal data, hierarchical Gaussian processes for outlier detection.
- Became permanent employee after starting as contractor.

PUBLICATIONS

[1] F. Jimenez and M. Katzfuss, “Scalable Bayesian Optimization Using Vecchia Approximations of Gaussian Processes,” arXiv:2203.01459.

[2] F. Jimenez, A. Koepke, M. Gregg, and M. Frey, “Generative Adversarial Network Performance in Low-Dimensional Settings,” *Journal of Research of National Institute of Standards and Technology*, vol. 126, 2021.

ABOUT ME

I’m a second year PhD student in statistcs working on scalable Bayesian optimization for high dimensional problems.

EDUCATION

Ph.D., Statistics

Texas A&M University

2020-2024 College Station, TX

M.S. / B.S., Applied Mathematics

University of Colorado Boulder

2014 – 2018 Boulder, CO

Courses

• Bayesian inference • Bayesian computation • probabilistic graphical models • NLP • measure theory • math stat • linear models • network science • numerical analysis • time series • spatial statistics

Community Engagement

- Mentoring statistics undergrad student.
- Stat department student government.

TECHNICAL SKILLS

Programming

- Languages: Python, R
- Libraries: PyTorch, BoTorch, NumPy, Pyro
- Visualization and writing: ggplot, LaTex.

Stats & ML

- Bayesian optimization, Bayesian statistics
- Gaussian processes, generative adversarial networks
